Ø56

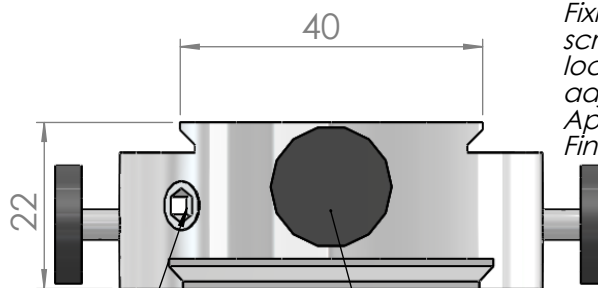

4 Justier- Rändelschrauben M4, erlauben die Feinpositionierung des Tisches in X und Y- Richtung um je bis +3mm. Eine Schraubenumdrehung = 0,4mm Verstellung. Fixierung der Position mit der Feststellschraube verändert nicht die eingestellte Position, da der Feststellmechanismus unabhängig von dem Vorschub funktioniert.

Anwendungsbeispiel: Feinverstellung Kameraschutzgehäuse

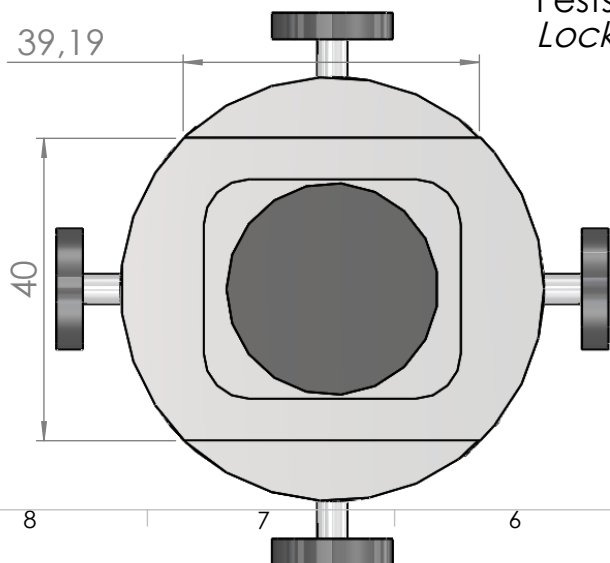

4 adjustment screws allow fine-positioning of the table in X and Y direction up to +3mm in each direction. One adjustment screw turn corresponds 0,4mm displacement. Fixing the table in position with the locking screw does not change the position, as the locking mechanism is independent from the adjustment.
Application example:
Fine adjustment of camera enclosure.

Feststellschraube
Locking screw

Rändelschrauben zur werkzeuglosen Bedienung
Knurled head screws for tool free positioning
